

SOUNDHAR RAJ V

Full Stack Developer | Software Engineering Enthusiast

+91 63808 31039 | soundharrajvellingiri@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience in Java, C, Python, JavaScript, SQL, and full-stack web development. Experienced in developing web applications, managing databases, and delivering end-to-end academic software projects. Active participant in national-level hackathons including YUGAM, CODECRAZE, SIH 2025, and Hacksagon 2026. Strong foundation in data structures, algorithms, object-oriented programming, and problem solving, seeking opportunities to contribute to real-world software development and build scalable applications. Developed three full-stack web applications using React, TypeScript, Firebase, and PostgreSQL, including a workflow management portal and an AI-powered note sharing platform.

TECHNICAL SKILLS

Programming Languages: Java, C, Python, JavaScript, TypeScript

Frontend: React, HTML5, CSS3, Responsive Web Design

Backend / BaaS: Firebase, Supabase

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, VS Code

Concepts: Data Structures, Algorithms, Object-Oriented Programming, Software Development

PROJECTS

SmartNotes – AI-Powered Note Sharing and Summarization Platform | Project Team Lead | 2025

Tech Stack: React, TypeScript, Firebase, CSS | GitHub: github.com/SOUNDHARRAJV/SmartNotes

- Developed a web-based platform enabling students to upload, organize, and summarize academic notes for efficient study management.
- Introduced structured note categorization, enabling easy discovery and retrieval of uploaded study materials through a searchable interface.
- Architected scalable application infrastructure using Firebase backend services for secure data storage and management.
- Led project team in coordinating full-stack development, feature implementation, and end-to-end software delivery.

Centralised Approval Management Portal | Full Stack Developer | 2026

Tech Stack: React, TypeScript, PostgreSQL, Supabase, CSS | GitHub: github.com/SOUNDHARRAJV/change-approval-system

- Created a web-based change approval platform designed to streamline request and approval workflows in institutional or organizational environments.
- Engineered role-based access allowing users to submit change requests while administrators review, approve, or reject requests.
- Built responsive user interfaces and integrated backend services to manage requests, approvals, and user data efficiently.
- Designed structured approval workflows to track request status and maintain transparency in decision-making processes.

SRK Farms – Farm-to-Home Product Listing Platform | Developer | 2024

Tech Stack: HTML, CSS, JavaScript | GitHub: github.com/SOUNDHARRAJV/srk-ecom-farm

- Constructed a responsive web application with 10+ product listing pages optimized for mobile and desktop devices.
- Implemented product listing pages and a contact-based ordering workflow connecting customers with the farm.
- Configured responsive user interfaces compatible across mobile and desktop devices.
- Optimized browsing experience through organized product sections and intuitive page navigation.

HACKATHONS & TECHNICAL EVENTS

- YUGAM – Code2Duo Hackathon, Kumaraguru College of Technology (KCT), Coimbatore
- CODECRAZE Hackathon, Coimbatore Institute of Technology (CIT), Coimbatore
- Smart India Hackathon (SIH) 2025 – Internal Hackathon Participant
- Hacksagon 2026 – Hackathon Participant

EDUCATION

B.Tech – Bannari Amman Institute of Technology | 2023 – 2027 | CGPA: 7.96

Higher Secondary (SSSE) – The Optimus Public School | 2021 – 2023

Secondary School (SSE) – Chanakya International School | 2018 – 2021

CERTIFICATIONS

- SQL Basics
- Microsoft Excel
- Introduction to CyberSecurity
- Introduction to Web Development – IBM

CODING PROFILES

LeetCode: [LeetCode](#) – Solved 350+ problems focused on data structures and algorithms

HackerRank: [HackerRank](#) – 4★ C | 3★ Python
